TECHNOLOGIES

Frontend: Javascript, React, HTML5, CSS3, MaterialUI, Figma

Backend: Groovy, Grails, Node.js, Express, REST API, JSON, PostgreSQL, Knex.js, MySQL, Postman, Docker

Version Control: Git, GitHub

EXPERIENCE

TodayTix Group *Software Engineering Intern*

New York City, NY | Jun 2024 - Aug 2024

- Delivered a successful internship project resulting in the creation of over 10,000 rewards for users using SQL queries/scripts and code on our backend to maintain the creation of rewards for customers. Also developed a system that streamlined replication for developers, ensuring future scalability.
- Collaborated with key stakeholders on my project, ensuring successful integration and execution of the rewards system.
- Contributed to the successful on-time launch of our rewards program by developing and implementing a backend lottery multiplier feature with Groovy, positively impacting over 500,000 users and enhanced their chances of winning a lottery.
- Supported engineering team operations by operating as a full-fledged engineer handling tickets, conducting QA, writing technical documentation, participating in team meetings and ensuring high-quality releases through effective collaboration.

Starbucks Barista / Barista Trainer

Brooklyn, NY | Jan 2022 - Jan 2023

- Leveraged exceptional communication skills to consistently deliver prompt and friendly customer service, efficiently serving a high volume of customers daily at the district's busiest Starbucks location.
- Played a key role in significantly improving our location's customer connection score by over 20%, actively engaging with customers, and fostering positive interactions.

PROJECTS

HealthSync | [Github](#) | [Website](#) | *Fullstack Developer / Scrum Master*

Feb 2024

- Spearheaded a community-driven fitness application, HealthSync, designed to empower Brooklyn residents in their fitness journey by facilitating seamless event creation and exploration.
- Incorporated authentication and authorization features in HealthSync using Express.js and PostgreSQL, ensuring user data privacy and security throughout the platform.
- Utilized Zustand for efficient state management in HealthSync, ensuring seamless data flow and application responsiveness.
- Tech Stack: JavaScript, React, Express, PostgreSQL, Knex, CSS, Vite, Tailwind, Socket.io, Zustand, Render, Git

LeetNotes | [Github](#) | [Website](#) | *Fullstack Developer*

Jan 2024

- Constructed a web application designed to help you organize and take notes on LeetCode problems efficiently.
- Implemented a sign-up and log-in feature that utilizes authentication and authorization to ensure user data privacy and security.
- Employed MaterialUI and React to craft dynamic components like search bars and pagination, improving user navigation in the LeetCode catalog sourced from the LeetCode api.
- Tech Stack: JavaScript, React, Express, PostgreSQL, Knex, CSS, Vite, MaterialUI, Editor.js, Render, Git

EDUCATION

GSWEP Software Engineering Fellowship - Google

New York, NY | Mar 2024 - Jun 2024

- Selected from a competitive pool of aspiring software engineers to participate in a 10-week-long mentorship program with a Google SWE.
- Enhanced my technical skills and my knowledge of Data Structures and Algorithms.

Software Engineering Fellowship - The Marcy Lab School

Brooklyn, NY | Mar 2023 - Mar 2024

- Completed 2,000 hours of coursework in web development, CS fundamentals, and leadership development.
- Developed proficiency in HTML/CSS, JavaScript, NodeJS, React, Express, PostgreSQL.

AAS - New York City College of Technology

Brooklyn, NY | Jan 2018 - Jan 2021

- Completing coursework toward an associates in construction management.
- 3.49 GPA.
